Experience

Research Data & Operations Assistant (CMDM Lab, UHH)

Hamburg, Germany | September 2025 - ongoing

As a part of the CMDM Lab (PI: Prof. Dr. Sebastian Gluth), I work as a data collection and research assistant. This role involves in instructing and accompanying participants who volunteer to join in decision making studies. In addition, I organize the flow of the testing sessions. After the final part of data collection, I will also take over data analysis. In close collaboration with the lab manager, I also develop guides to make integration of the newly employed people run more smoothly. This lab is the most international and multi-cultural lab of the psychology department, which improves my working and collaboration style and helped me implement the previously learned skills in the LMoC Lab.

Scientometric Analyst

Hamburg, Germany | March 2025 - ongoing

In a project that involves more than 250 scientists from all over the world, I am responsible for assessing their qualifications based on objective factors such as h-index, publications, impact factors and citations. I work with large spreadsheets and organize, filter, clean, and analyze data and build personalized dashboards of qualifications of the involved people in the project. The data is catches from Google Scholar servers, using a script that I developed via R programming language to optimize the assessment process by automation of repetitive tasks. The result of this project is expected to be published in a world class journal.

Research Assistant (Learning & Mechanisms of Change (LMoC), UHH)

Hamburg, Germany | March 2025 - August 2025

To gain deeper insight into the research process and acquire hands-on experience, I manage participant data, recruit participants, and expand my knowledge in computational modelling. This diverse set of tasks not only challenges my flexibility in handling a wide range of responsibilities but also actively involves me in the research process, allowing me to gain practical experience. The LMoC Lab is an international lab which requires flexibility, cultural awareness, and interpersonal skills to work in.

Open Educational Resources Project , *Research Assistant*
Hamburg, Germany | September 2024 - March 2025

This project is under the supervision of Dr. Lennart Wittkuhn at the University of Hamburg. The project aims to decentralize educational materials and make them more accessible for professors and students.

Track, Organize and Share your work: An Introduction to Git for Psychological Research , *Teaching and Research Assistant*
Hamburg, Germany | November 2024 - March 2025

This course is provided by Dr. Lennart Wittkuhn at Erasmus University Rotterdam and University of Hamburg. The course aims to familiarize the students with applications of Git in psychological research and research data management.

Projects (Selected)

Assessment Center Project, (UHH)
Hamburg, Germany | October 2024 - March 2025

In this project, we worked closely together in a team, to develop a fully functional assessment center and run it using 4 applicants who want to be pilots. The project was a mimic of the real process, however, every step, from developing the scenarions, designing the interview process, and use of psychological tests to inviting the applicants to the university andd writing a report (Gutachten in German) happend really. This project was a part of Eignungsdiagnostik project based seminar at the UHH under instruction of Dr. Frank Spohn.
